Job Description:

We are looking for a good JavaScript developer who is proficient with React.js. Your primary focus will be on developing user interface components and implementing them following well-known React.js workflows (such as Flux or Redux). You will ensure that these components and the overall application are robust and easy to maintain. You will coordinate with the rest of the team working on different layers of the infrastructure. Therefore, a commitment to collaborative problem solving, sophisticated design, and quality product is important. Must understand the ins and outs of ReactJS, with an obsession for code quality. We want someone that is proud and obsessive in delivering quality products. Get-it-done attitude as an independent thinker who enjoys creating solutions in a collaborative environment.

Principal Duties and Responsibilities:

- Understand inheritance in Javascript and object oriented and functional programming concepts
- Developing new user-facing features using React.js
- Extensive experience with React, Redux, flux, GSAP
- Expertise with HTML5 and CSS3
- good knowledge in Bootstrap 4
- Comfortable translating complex visual designs and wireframes into clean and modular HTML markup and CSS
- Know how to work with version control systems.
- Building reusable components and front-end libraries for future use
- Optimizing components for maximum performance across a vast array of web-capable devices and browsers

Mandatory: ReactJS, React Redux, HTML5, CSS3, Typescript, JavaScript,

Skills:

- Strong proficiency in JavaScript, including DOM manipulation and the JavaScript object model
- Attention to details.
- Good knowledge in Micro Animations.
- Proficiency in creating Prototypes / wireframes.
- Thorough understanding of React.js and its core principles
- Experience with popular React.js workflows (such as Flux or Redux)
- Familiarity with newer specifications of ECMAScript
- Experience with data structure libraries (e.g., Immutable.js)
- Knowledge of isomorphic React is a plus
- Familiarity with RESTful API and WebSockets
- Knowledge of modern authorization mechanisms, such as JSON Web Token
- Familiarity with modern front-end build pipelines and tools
- Ability to understand business requirements and translate them into technical requirements
- A knack for benchmarking and optimization
- Familiarity with code versioning tools {{such as Git, SVN, and Mercurial}}.
- Canvas Scripting would be an added advantage.
