

## “Great Vision Without Great People Is Irrelevant”

### Mobile App Developer

Position: iOS Mobile App Developer

Experience: 2 years+

Job Location: Goa/Kochi

### Our Company Vision

Our Company Vision is to nurture the best resources and to be globally recognised as an exclusive brand of choice for both Internal and External Stakeholders. We facilitate innovative holistic services with Respect and Virtue.

### Introduction: Source It Out

Source IT Out (SIO) is a fast-growing technology-based Global Outsourcing Company with a large base of international clients. The Company is headquartered in the capital city of Goa in Panaji, having a branch office in Kochi. We offer a vast range of services from highly technical expertise to essential services like finance, operations, marketing & customer support solutions. Source It Out is a Knowledge Process Outsourcing Company (KPO) helping SME's increase their profit margins by outsourcing knowledge-based tasks and objectives. There are many benefits in working with SIO apart from our U.K clientele.

We are thrilled and excited to offer this opportunity to the best candidate and place heavy emphasis on recruiting the right candidate for the job role. SIO is ONLY looking for highly driven candidates who wish to be challenged and be recognised for their ability.

If you are the kind of individual with unrecognised talent and hunger who will be willing to learn and push the envelope, SIO is the right Company for you. If you wish to challenge, grow, develop and truly be a part of an incredible journey, then please come and meet us, say hello and see how we can work together.

### Responsibilities and Duties:

- Understand client requirements and how they translate in application features on design level.
- Collaborate with a team of IT professionals to set specifications for new applications.
- Write quality source code to program complete applications within deadlines.
- Evaluate existing applications to reprogram, update and add new features.
- Develop technical documents and handbooks to accurately represent application design and code.

### Requirements:

- Proven experience as a Native application developer for at least 1 year.
- Ability to program in programming language such as C#, Java, etc.
- In-depth knowledge of programming for diverse operating systems and platforms using development tools such as Xcode, Android Studio and Visual Studio.
- Excellent understanding of software design and programming principles.
- A team player with excellent communication skills and hands-on working with the distributed version control system.

**Note: Training will be given on the framework which we pursue initially.**
